# COMMENTS BY THE EXECUTIVE CHAIRMAN

## Disappointing Quarter, but we finally see tendency of brighter times ahead.

The third quarter continued as the second quarter. The retail market continued to be driven by price pressure and warm weather. Due to the middle east situation, there were larger than expected delays in the supply chain. This not only creating delays to Europe, the following lack of containers also hurt deliveries in the US. This meant that compared to last year we faced challenges in delivering to our Brands and Global sales customers, including Frilufts, also facing shortages in deliveries from other brands. We also saw certain effects of preorders that last year were delivered in Q3 now are delivered in Q4 as our customers are requesting later deliveries due to the late arrival of colder weather. So, from a sales view there is not much positive to say, even though we do have growth in some markets. I would like to point out Canada as one market that showed growth as well as our joint venture in China.

In this tough environment we still managed to decrease our inventory and increase our gross margin. Our net liquidity increased to 29.3 MEUR from -10.6 MEUR last year. This was primarily driven by a decreased inventory level, which is down to a more manageable level. We still need to improve in some areas, but we also believe that due to some changes in the behavior, a potential need to increase inventory may happen, due to an overcaution among retailers when placing pre orders. The gross margin increased from 56.0 % to 57.7 %.

The Net sales for the quarter ended at 197.5 MEUR vs last year 222.9 MEUR, a decrease of 11.4 %, driven by the high inventory in the retail sector and a slower retail market in general. In terms of the split of consumer sales between digital and brick and mortar the changes had a shift, where brick and mortar outperformed digital in almost all markets.

We also had some higher temporary costs than anticipated.

### Brands

The Brands segment shows decreased sales of 20.8 %. The decrease was mostly driven by the North American retail sales, which was also driven by the closures of some nonperforming stores. This will, however lower the costs and improve the bottom line. Germany also performed below par, while the Nordics outperformed. The gross margin recovered compared to earlier quarters due to lower need to discount merchandise. The costs were kept under control and savings were taking effect.

## Global Sales

Overall Global sales decreased in net sales to 52.8 MEUR vs 63.3 MEUR last year. The decrease was mostly driven by North America and Asia, whereas the rest of the markets performed better. Gross margin was lower due to a different product mix. Also here costs were improved according to plan.

## Frilufts

Sales in the Frilufts operation showed a decrease of 2.3 %, from 99.7 MEUR to 97.4 MEUR. This was driven by a decrease in Germany. Almost all the German decrease came from digital sales, whereas many shops showed an improvement. The volatile warm situation also affected sales in Germany. In terms of result, this meant an impact on profitability. Frilufts also took a one time write off for softwares of 1.2 MEUR.

## North America

The North American did show a decrease in sales direct to consumer as well as wholesale. Besides a generally slow market the quarter was also hit by lower Kånken sales. Kånken proportion of sales is, due to the back school season, larger in Q3. The effect on total sales is therefore larger in this quarter.

## Digital/Channel development from a Group perspective

Our total brick-and-mortar sales was flat 86.5 MEUR vs 86.7 MEUR. Our digital sales decreased from 37.4 MEUR to 32.2 MEUR, -13.7 %. As we look at the performance of our brands in Frilufts and as especially Hanwag outperformed their competitors we believe we outperformed the competition in the full price selling in the market in general.

## Q4 sales

In terms of our expectations for Q4, it looks ok based on the performance during first couple of weeks. This is based on the performance in most of the Frilufts markets, but also on the reorder rate in both Brands and Global sales. However, due to the current situation in the market both politically and economically nobody knows.

## Going forward

There are challenges. The supply chain and transport problematic remain. This is reinforced by that some larger customers are placing their preorders closer to when they want delivery and thereby increasing our risk of getting higher costs for transports, to secure delivery. Internally we might be facing higher costs in scaling up our operations in Ludwigslust, as we are using the lower inventory level to speed up that process, but we

still must keep up our control of costs and become more efficient. We are also facing an unpredictable environment due to the ESG and CSR laws. An initial estimate, only counting reporting and administration, looks to increase the costs by around 1 MEUR per year.

However, we see a preorder book for the spring showing an increase compared to last year for Brands and Global sales. In general, the reception of the customers we have met, concerning next year's fall- and winterorders, are more positive. We have been able to start getting our costs sized better. We have a strong balance sheet that can enable us to invest in acquisition's should opportunities occur. In general, we are looking at the development as being quite positive as we believe we will see an end to this volatile market and that it will become normalized, at least in a more predictable way.

All the best

Martin Nordin, Chairman of the Board

## Report on the review of interim condensed consolidated financial statements

### Introduction

We have reviewed the interim condensed consolidated financial statements (consolidated income statement, consolidated statement of comprehensive income, consolidated statement of financial statement, consolidated statement of cash flows, consolidated statement of changes in equity and notes), pages 8 to 17, of Fenix Outdoor International AG for the period from 1 January 2024 to 30 September 2024. The Board of Directors is responsible for the preparation and presentation of these interim condensed consolidated financial statements in accordance with IAS 34 “Interim Financial Reporting”. Our responsibility is to express a conclusion on these interim condensed consolidated financial statements based on our review.

### Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410 “Review of Interim Financial Information Performed by the Independent Auditor of the Entity”. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

### Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the interim condensed consolidated financial statements are not prepared, in all material respects, in accordance with IAS 34 “Interim Financial Reporting”.
